

1

Hi, my name is Malik and i'm studying the Master in Game Design at the ZHdK. The informations you provide for this survey is a part of my Master thesis and it will help me to create a toolkit for Game Developers, who want to design a relaxing game experience for the players. You don't need to be a game developer to fill out this survey. You can write here your name or username if you want:

addroddyn#6127

2

How many hours do you spend, on playing video games per week?

30

3

Do you play video games to relax?

Yes

4

Please name at least 3 video games, which offer in your opinion a relaxing experience, with an explanation as to why you feel relaxed (more answers are also welcome):

Euro Truck Simulator (or any other simulator, really) - offers you a chance to zone out. Borderlands 3, or other fast paces shooters allow you to work through some stress. And finally Witcher 3 or RDR2, or any other story-heavy game lets you experience good stories.

5

Please name at least 3 video games, which offer in your opinion a stressfull experience, with an explanation as to why you feel stressed (more answers are also welcome):

Any multiplayer game for me personally, like Apex Legends, Dauntless, or MMOs - dealing with people can be stressful

6

Am i allowed to quote your statements?

Yes

7

Thank you very much for participating, you can type here other comments, in regards to relaxing game experiences. Please share this survey with other people, to get as many valuable information as possible!

Imo any game that feels like I'm not rushed, that I can do things on my own time, can be relaxing. Taking The Witcher 3, for example, I can focus on the main story, but I can also do side quests or contracts or play gwent or whatever.
