

1

Hi, my name is Malik and i'm studying the Master in Game Design at the ZHdK. The informations you provide for this survey is a part of my Master thesis and it will help me to create a toolkit for Game Developers, who want to design a relaxing game experience for the players. You don't need to be a game developer to fill out this survey. You can write here your name or username if you want:

popoiyo

2

How many hours do you spend, on playing video games per week?

168

3

Do you play video games to relax?

Yes

4

Knytt Underground: The world and the music.

Machinarium: The world, the art and the music.

The Tiny Bang Story: The art and the music.

5

Please name at least 3 video games, which offer in your opinion a stressfull experience, with an explanation as to why you feel stressed (more answers are also welcome):

League of Legends: Toxic community, too repetitive and too much luck-based.

FTL: Too much luck-based.

Fortnite: Too repetitive.

6

Am i allowed to quote your statements?

Yes

7

Thank you very much for participating, you can type here other comments, in regards to relaxing game experiences. Please share this survey with other people, to get as many valuable information as possible!

For a game to be relaxing, it should offer a world to escape to and become lost in. Music plays a huge role in immersion.
